

# MG S-SLIP

The **MG S-SLIP** Panels have a slip connection and are mechanically fastened with integrated clips and concealed fasteners. The panels are installed in a sequential pattern, overlapped and sealed as required to form a watertight system. Additional size and material options are available. Contact M.G. McGrath, Inc. for information.

# MG S-SLIP

The **MG S-SLIP** Panel offers the appearance of a smooth flat seam with minimal oil canning. The panels are installed from the bottom up and can be radius or tapered. The integral gutter channel provides superior drainage and allows fastening without additional parts or assembly. The S-Slip panel is most commonly used as a rain screen system. Panels are available in a wide variety of materials and colors to create unique designs. Please contact M.G. McGrath for more detailed information regarding your project.
