GREAT PEOPLE. AMAZING RESULTS.

MG F-SEAM

FLUSH SEAM PANEL SYSTEM

DESCRIPTION

The MG F-Seam panel system offers a smooth flat appearance for either vertical or horizontal applications. The architectural rib option stiffens the panel and reduces oil canning. Our F-Seam panel systems are formed continuous and have an interlocking slip connection. The panels are mechanically fastened with concealed fasteners to form a flush, hairline joint that offers a clean appearance. The panels are installed in a sequential pattern, overlapped and sealed as required to form a watertight system

FEATURES AND OPTIONS

- Includes interlocking slip connection clips and stiffeners if required
- Panel system to accommodate substructure tolerance of +0 to -1/8 inch
- Panels can be installed over almost any substrate
- Custom alloys available based on material choice
- Milled, brushed, mirrored, colored, and textured finish options available

MATERIALS & FINISHES

MATERIAL	THICKNESS	SIZES (TYPICAL)	FINISHES
Stainless	24 – 16 gauge	Seam Spacing: 6" or 20" Length: 6" to 50"	Standard and custom colors available
Aluminum	.032" to .125"	Seam Spacing: 6" or 20" Length: 6" to 50"	Standard and custom colors available
